

BIRDY

„Birdy is always there when you come home after a long day and can't wait to put your feet up. Birdy is individual and multi-functional.“
(Designer Pascal Bosetti)

Product information “Birdy - now! by hülsta“

It works as a casual extra seat or as a comfortable footstool. The new birdy from now! by hülsta is a stylish yet multi-functional statement and with 10 different pure wool fabrics it will match various room concepts.

Its mobile and light-hearted look makes it an alternative to pouffes, which – weighed against their benefits – often use a lot of space. The new birdy was created by Pascal Bosetti. The 34 years old designer from Munich stands for furniture with character, which are both functional and emotional. Exactly this concept has brought him renowned awards, among them the “German Design Award 2015“ from the German Design Council.
